-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Information Disclosure Statement

The international search report and cited references have been received in this application but they are not accompanied with an information disclosure statement and a form PTOI-1449. This fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. The documents have been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scherer (3,121,686).

Scherer discloses a lubricant composition comprising as a base oil mineral oil, synthetic oil and mixtures thereof. Suitable synthetic oils include a polyisobutylene polymer having a molecular weight 7,500 and 400,000. See Example 1 in column 8, which includes both mineral oil and a polyisobutylene. Scherer also allows for the addition of a suitable thickener to the lubricant composition which includes a paraffin such as microcrystalline wax which is a refined petroleum wax. Scherer teaches that particularly good results are provided using the paraffin

wax in amounts between about 10-60 parts by weight. See column 7, lines 47-75. Scherer also allows for the addition of a filling agent selected from mica, graphite and molybdenum disulfide. Thus the examiner is of the position that the lubricant composition of Scherer meets the limitations of the above rejected claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.
